

Welcome!

Welcome to the 2005 FIA Historic Motor Sport Commission Seminar. As you already know we have a new format this time as only the technical side of the historic motor sport has been invited.

Most of the presentations come from the FIA Historic Motor Sport Commission Technical Working Group and the rest of the day you will be in their hands.

Before handing to Jürgen Barth I wish, on behalf of the Commission, to underline that all the members of this commission has a solid backgrounds in the sport. That does not mean that each and every one of them can have a reply to all your questions. It means that they, as a commission, have different backgrounds as organisers, drivers, engineers, administrators and archivists.

That's why we have a commission rather than one man taking all the decisions. We are very pleased to work with you and, once again, on behalf of the Commission, would like to thank you all for all the effort and hours that each of you give to our sport. Without people like you there would be no complicated sports like historic motor sport.

One last thing, just to make sure that I do not forget it at the end of the day. The dossier will be a CD-ROM which we hope that you will copy and give to your colleagues and friends who are not here today. There is, of course, no copyright but the FIA Historic Motor Sport Commission will be even more pleased if you give them a line of credit.

Thank you for coming, thank you for your time. The FIA Historic Motor Sport Commission looks forward to another year with all of you!

Gunnar Elmgren
